FABRIC & CONNECTIVITY

GFI-Stream

Valid/ready; packet boundaries; keep; ID; priority; metadata

IP-107 · Architecture IP · Architecture

Function and architecture

- Valid/ready
- packet boundaries
- priority
- metadata

Integration summary

GFI-Stream integration role: Garmo streaming interface. Documented composition: Valid/ready; packet boundaries; keep; ID; priority; metadata.

Technical record

Canonical identity	IP-107
Responsibility	Garmo streaming interface
Documented building blocks	Valid/ready; packet boundaries; keep; ID; priority; metadata
Delivery boundary	Architecture
Evidence scope	Architecture IP

Delivery and release binding

- Interface version and parameter set
- Clock/reset domains and integration constraints
- Companion memory, PHY and software requirements
- Verification collateral and acceptance criteria

Confirm for the selected release: Node/library binding, Clock/reset limits, Physical and protocol dependencies, Artifact hashes, Acceptance criteria.

Evidence and qualification

Canonical technology and its architecture/integration role are recorded. The offered delivery is confirmed against the exact release before licensing.

No node-port, silicon-performance, standards certification or analog qualification is inherited from a related product.

Canonical status: Reusable interface IP

Evaluation and licensing

Evaluation: Evaluate an individual IP configuration. Production: Named-design production license. Custom work: Node binding or derivative integration. Rights, pricing, support and acceptance criteria are agreed for the exact scope.
