MEMORY & STORAGE

KENBE-HBM

Wide-channel HBM control target with scheduling, health routing, integrity metadata and tier migration.

IP-3993 · RTL + models · Soft IP / model

Function and architecture

- Wide-channel HBM control target with scheduling
- health routing
- integrity metadata and tier migration

Integration summary

KENBE-HBM addresses wide-channel HBM control target with scheduling, health routing, integrity metadata and tier migration.

Technical record

Canonical identity	IP-3993
Responsibility	Wide-channel HBM control target with scheduling, health routing, integrity metadata and tier migration.
Delivery boundary	Soft IP / model
Evidence scope	RTL + models

Delivery and release binding

- Interface version and parameter set
- Clock/reset domains and integration constraints
- Companion memory, PHY and software requirements
- Verification collateral and acceptance criteria

Confirm for the selected release: Node/library binding, Clock/reset limits, Physical and protocol dependencies, Artifact hashes, Acceptance criteria.

Evidence and qualification

Our records show source/model or productization evidence for this IP. The selected HDL, verification and physical views are reviewed per release.

No node-port, silicon-performance, standards certification or analog qualification is inherited from a related product.

Canonical status: P1/P2 / SOURCE RTL BOUNDARY; HBM PHY/PACKAGE/COMPLIANCE OPEN

Evaluation and licensing

Evaluation: Evaluate an individual IP configuration. Production: Named-design production license. Custom work: Node binding or derivative integration. Rights, pricing, support and acceptance criteria are agreed for the exact scope.
