OPERATING SYSTEMS

GarmoOS

Native ID GONE-IP-001. Common secure runtime architecture across phone, tablet, computer, spatial, wearable and home nodes, with device-specific kernel/profile implementations.

IP-819 · Architecture program · OS / runtime architecture

Function and architecture

- Common secure runtime architecture across phone
- tablet
- computer
- spatial
- wearable and home nodes
- with device-specific kernel/profile implementations

Integration summary

GarmoOS: Common personal-computing operating-system architecture Delivered as OS / runtime architecture. Integrate the selected version at its documented input/output boundary; retain source and configuration identity with each result. The exact callable API, dependencies and runtime environment are supplied with the controlled release; this public description is not a substitute for that release contract.

Technical record

Canonical identity	IP-819
Responsibility	Common personal-computing operating-system architecture
Documented building blocks	Common secure runtime architecture across phone, tablet, computer, spatial, wearable and home nodes, with device-specific kernel/profile implementations.
Delivery boundary	OS / runtime architecture
Evidence scope	Architecture program
Engineering boundary	Common personal-computing operating-system architecture
Deployment	OS / runtime architecture;
Operational scope	The named architecture and its implementation scope are not a blanket shipping-product, physical qualification or production-deployment claim. The exact release controls evaluation.

Delivery and release binding

- Versioned package and dependency lock
- Deployment environment and access controls
- Input/output schemas and integration examples
- Evaluation scope, support and update policy

Confirm for the selected release: Environment and dependencies, Version / build hash, API compatibility, License and support scope.

Evidence and qualification

Canonical GONE reusable software/runtime IP; implementation evidence is release-specific

The named architecture and its implementation scope are not a blanket shipping-product, physical qualification or production-deployment claim. The exact release controls evaluation.

Canonical status: Canonical GONE reusable software/runtime IP; implementation evidence is release-specific

Evaluation and licensing

Evaluation: Evaluate the named software release. Production: Team or enterprise deployment. Custom work: Workflow and API integration. Rights, pricing, support and acceptance criteria are agreed for the exact scope.
